Art Unit: 1653

Claims 1-9 have been canceled. Claims 10-15 are currently pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-15, drawn to a method for reducing heme loss in vivo, classified in class 514, subclass 6.
- II. Claims 10-15, drawn to a method for reducing heme loss in vitro, classified in class 514, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are drawn to methods utilizing mutated heme. Inventions I and II differ because a method of administering the heme in vivo is wholly different to the method of administering heme into an in vitro system. Therefore, Inventions I and II are patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
